Technical Dimensions

- 1. All Dimensions are in mm.
- 2. Lead Spacing in measuremend whre the lead emerge from the package
- 3. Prodruded resin under flange is 1,5mm max.
- 4. Tolerance are 0,3mm unless otherwise noted.
- 5. Specifications are subject to change without notice
- 6. Driving LED without heat sinking device is forbidden
- 7. Warps the degree 0,5mm
- 8. Leds are not designed must to be driven in reverse bias.
- 9. Proper current derating must be observed to maintain junction temperature below the maximum
- 10. It is strongly recommended that the temperature of lead be not higher than 55°C.

10Watt High Power LED

Standard Voltage

EACH **RoHS** Lead Free

Features

Long operating life Instant Light Superior ESD defense Low Voltage DC operated Color bright satured More energy efficient than incandescent and most halogen lamps

EDCON-COMPONENTS High Power LED is make of hi-eff AS/TS GaInN chips with precide package technique which makes excellent heat dissipation to reach the advantages of high lunious efficiency, low decay, and long endurance. Now we have these colors available RED, GREEN, BLU, YELLOW, WHITE.

Absolute Maximum Ratings

| Parameter | Symbol | Max. Rating | Unit |
|-------------------------------|--------|-------------|------|
| Continuous Forward Current | IF | 700 | mA |
| Peak Forward Current *1 | IFM | 1000 | mA |
| Electrostatic Discahrge (HBM) | ESD | 4000 | V |
| LED Juntion Temperature | Tj | 135 | Ĵ |
| Operating Temperature | Topr | 40 ~ +110 | C |
| Storage Temperature | Tstg | 40 ~ +120 | C |

Manual Soldering Temperature 260°C for 5seconds max . 2

TA=25℃

*1 Duty Ration = 00,1%, Pulse Width=10us.

*2 Iron soldering high temperature will not cause damage to the dice. But be aware of the high temperature will make the epoxy soften and the gold wire broken and even open. So before returning to the normal temperatures please avoid any serious pressure on the top of epoxy and lead.

*3. We suggest using PWM (Pulse Width Modulation) for driving.

*4 It is recommended to use series as there are several 3pcs. If there are more than 5pcs, please use product with higher power.

Operating Instructions

It is important to keep away thre product from the water, in order to avoid the product electronic characteristics to be harmful

When making use of products, it is necessary to use anti ESD devices to prevent destructive electronic characteristics.

Jason

Schumi

CHKD

Wilson

There is 150℃ directly from the front of Power LED emitting diode. It is untouchable to prevent burning.

MATL:

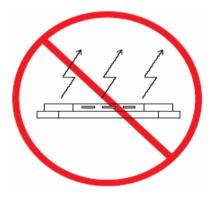

FINISH

Convection effect

REACH

RoHS Lead Free

It is should be noticed whether there is convection in design of device. Convection has to exist.

The product should not be light up directly without heat dissipation device

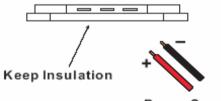

Mason

Sheet No.
