Technical Dimensions

- 1. All Dimensions are in mm.
- 2. Lead Spacing in measuremend whre the lead emerge from the package
- 3. Prodruded resin under flange is 1,5mm max.
- 4. Tolerance are 0,3mm unless otherwise noted.
- 5. Specifications are subject to change without notice
- 6. Driving LED without heat sinking device is forbidden
- 7. Warps the degree 0,5mm
- 8. Leds are not designed must to be driven in reverse bias.
- 9. Proper current derating must be observed to maintain junction temperature below the maximum
- 10. It is strongly recommended that the temperature of lead be not higher than 55°C.

10Watt High Power	· LED
Standard Voltag	ge

Part No.: **M15013**

Customer:

DRW:	Jason	CHKD	Wilson	MATL:	Wilson	TOLERANCE	Mason	DATE	05.01.2011
APPD:	Schumi			FINISH	Jamy		Shee	t No.	2 from 14

Features Discription

Long operating life
Instant Light
Superior ESD defense
Low Voltage DC operated
Color bright satured
More energy efficient than incandescent and most halogen lamps

EDCON-COMPONENTS High Power LED is make of hi-eff AS/TS GalnN chips with precide package technique which makes excellent heat dissipation to reach the advantages of high lunious efficiency, low decay, and long endurance. Now we have these colors available RED, GREEN, BLU, YELLOW, WHITE.

Typical Applications

Decoration Lights
Beacon light
Bathrooms Light
Medical applications
Architectural detail lighting

10Watt High Power LED Standard Voltage

Absolute Maximum Ratings

Parameter	Symbol	Max. Rating		Unit
Continuous Forward Current	IF	70	00	mA
Peak Forward Current *1	IFM	1000		mA
Electrostatic Discahrge (HBM)	ESD	4000		V
LED Juntion Temperature	Ti	G/B	135	Ç
	1)	R/Y	125	C
Operating Temperature	Topr	40 ~ +110		${\mathfrak C}$
Storage Temperature	Tstg	40 ~	- +120	${\cal C}$

Manual Soldering Temperature 260℃ for 5seconds max . 2

TA=25℃

- *1 Duty Ration = 00,1%, Pulse Width=10us.
- *2 Iron soldering high temperature will not cause damage to the dice. But be aware of the high temperature will make the epoxy soften and the gold wire broken and even open. So before returning to the normal temperatures please avoid any serious pressure on the top of epoxy and lead.
- *3. We suggest using PWM (Pulse Width Modulation) for driving.
- *4 It is recommended to use series as there are several 3pcs. If there are more than 5pcs, please use product with higher power.

Operating Instructions

It is important to keep away thre product from the water, in order to avoid the product electronic characteristics to be harmful

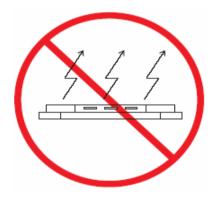

When making use of products, it is necessary to use anti ESD devices to prevent destructive electronic characteristics.

There is 150℃ directly from the front of Power LED emitting diode. It is untouchable to prevent burning.

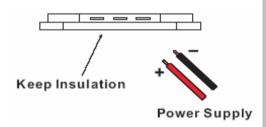

It is should be noticed whether there is convection in design of device. Convection has to exist.

The product should not be light up directly without heat dissipation device

The material in the central top of POWER LED is soft. Therefore, it is unsqueenzable and untouchable.

In the button of heat sink cannot be touched with neither positve nor negative pole. (Heat sink has to be insulation)
