DATA SHEET

100Watt High Power LED Standard Voltage

Serie: M15019

Wavelength **6000= 6000ºK**

Brightness **7200= 7200lm**

Color: **PW= Pure White**

DRW:	Jason	CHKD	Wilson	MATL:	Wilson	TOLERANCE	Mason	DATE	05.01.2011	**100Watt High Power LED Standard Voltage**

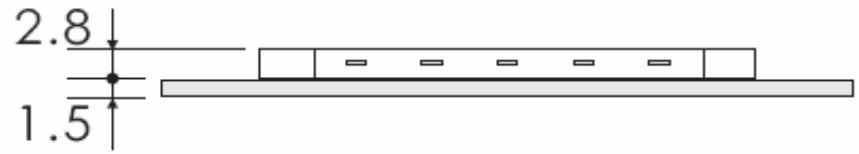
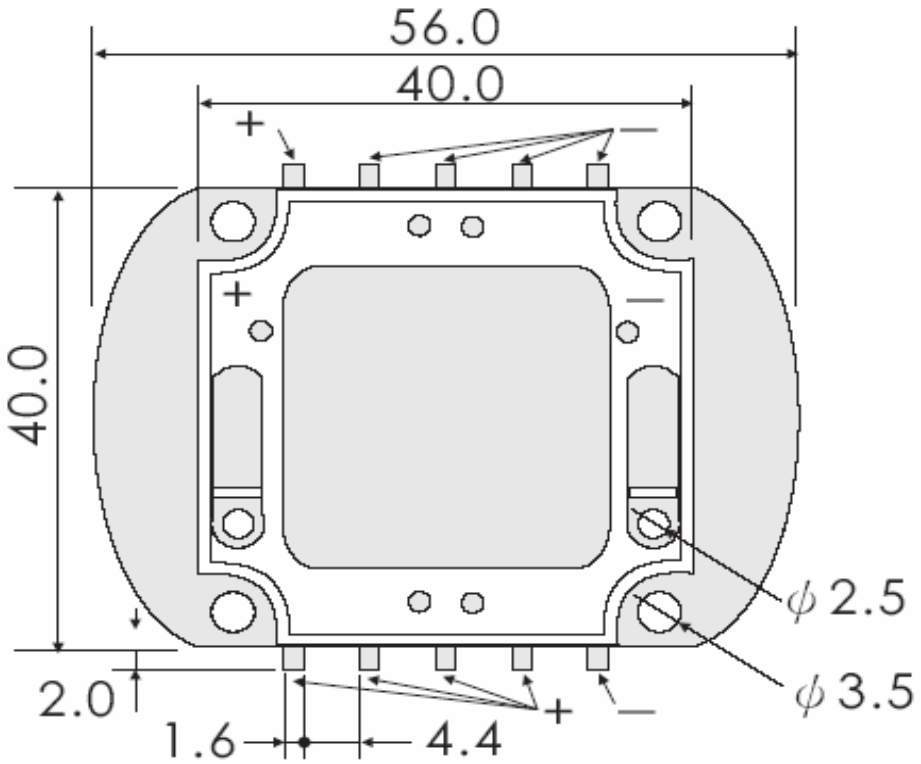
Technical Dimensions





1. All Dimensions are in mm.
2. Lead Spacing in measuremend whre the lead emerge from the package
3. Prodruded resin under flange is 1,5mm max.
4. Tolerance are 0,3mm unless otherwise noted.
5. Specifications are subject to change without notice
6. Driving LED without heat sinking device is forbidden
7. Warps the degree 0,5mm
8. Leds are not designed must to be driven in reverse bias.
9. Proper current derating must be observed to maintain junction temperature below the maximum
10. It is strongly recommended that the temperature of lead be not higher than 55℃.

100Watt High Power LED
Standard Voltage

Part No.: **M15019**

APPD:	Schumi			FINISH	Jamy		Sheet No.		2 from 14

Customer:

EDCON-COMPONENTS

Features

Long operating life
Instant Light
Superior ESD defense
Low Voltage DC operated
Color bright satured
More energy efficient than incandescent and most halogen lamps

Discription

EDCON-COMPONENTS High Power LED is make of hi-eff AS/TS GaInN chips with precide package technique which makes excellent heat dissipation to reach the advantages of high lunious efficiency, low decay, and long endurance. Now we have these colors available RED, GREEN, BLU, YELLOW, WHITE.

Typical Applications

Decoration Lights
Beacon light
Bathrooms Light
Medical applications
Architectural detail lighting

100Watt High Power LED

Absolute Maximum Ratings

Parameter	Symbol	Max. Rating	Unit
Continuous Forward Current	IF	2800	mA
Peak Forward Current *1	IFM	3000	mA
Electrostatic Discahrge (HBM)	ESD	4000	V
LED Juntion Temperature	Tj	135	℃
Operating Temperature	Topr	. -40 ~ +110	℃
Storage Temperature	Tstg	. -40 ~ +120	℃

Manual Soldering Temperature 260℃ for 5seconds max . 2

TA=25℃

*1 Duty Ration = 00,1%, Pulse Width=10us.

*2 Iron soldering high temperature will not cause damage to the dice. But be aware of the high temperature will make the epoxy soften and the gold wire broken and even open. So before returning to the normal temperatures please avoid any serious pressure on the top of epoxy and lead.

*3. We suggest using PWM (Pulse Width Modulation) for driving.

*4 It is recommended to use series as there are several 3pcs. If there are more than 5pcs, please use product with higher power.

Electrical- Optical Characteristics

Parameter	Symbol	Test Cond.	Min	Typ	Max.	Unit
View Angle of Half Power	2Ø1/2	IF=2800mA		120		deg.
Forward Voltage	VF			33	36	V
Color Rendering Index for 4000℃K	CRI			75		
Color Rendering Index for 3300℃K	CRI			70		
Thermal Resistance Junction to Case	RØ J-C			1,5		℃/W
Temperature Coefficient of Forward Voltage	Δ Vf/Δ T			.-2		mV/° C

TA=25℃

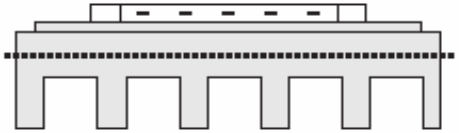
Conclusion



Free Convection Horizontal	
Flat Heat Dissipation Set-up	
(Area Require mm²)	
White	107,000

Free Convection Vertical	
Flat Heat Dissipation Set-up	
(Area Require mm²)	
White	79,500

Free Convection	
Finned Heat dissipation Set-up	
(Area Require mm²)	
White	371,000

TAB in this table is according to highest operating temperature 65℃

Different materials of second heat dissipation device, the surface area of heat sink will be different. Thus, this document is for reference only.

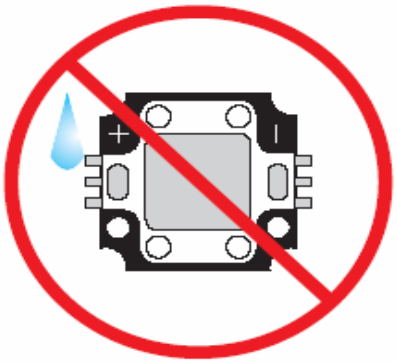
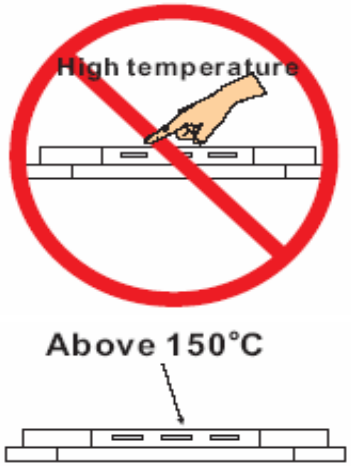
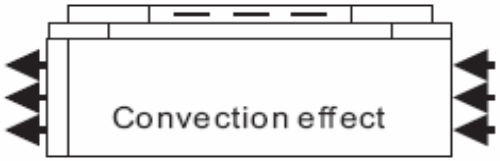
Operating Instructions



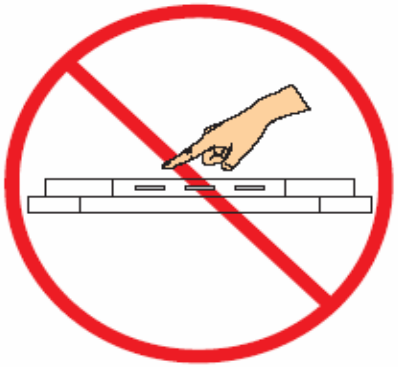
It is important to keep away thre product from the water, in order to avoid the product electronic characteristics to be harmful



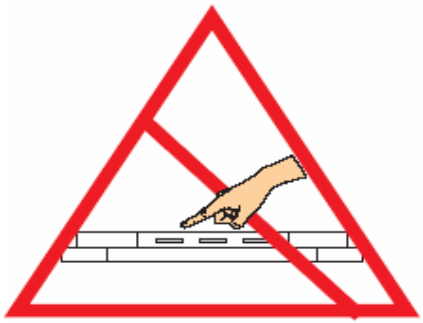
There is 150℃ directly from the front of Power LED emitting diode. It is untouchable to prevent burning.



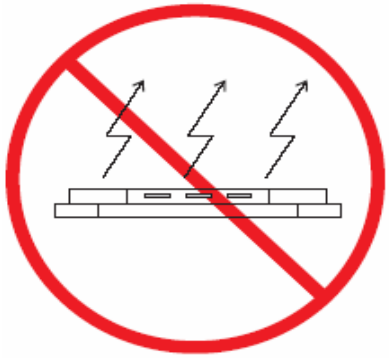
It is should be noticed whether there is convection in design of device. Convection has to exist.



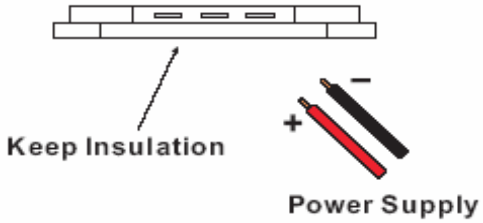
The material in the central top of POWER LED is soft. Therefore, it is unsqueenzable and untouchable.



When making use of products, it is necessary to use anti ESD devices to prevent destructive electronic characteristics.



The product should not be light up directly without heat dissipation device



In the button of heat sink cannot be touched with neither positve nor negative pole. (Heat sink has to be insulation)
